## EXPERIENCE

### Tortoise

Software Developer (Frontend) Oct 2024 - Present, Gurgaon, India

- Initiated & led the consolidation of 4 independent dashboards into a monorepo architecture, significantly streamlining the design-to-development workflow & improving code maintainability
- Spearheaded the development of Tortoise's UI Design System package using Atomic Design principles, resulting in pixel-perfect implementations, UI consistency, & reduced development overhead across all dashboards

### Adaapt AI (formerly Terobots)

Software Developer - Founder's Office June 2023 - September 2024, Remote, India

- Architected a robust authentication system with role-based access control using HOCs, Next.js middleware, cookie management, and Redux Toolkit for state handling
- Improved scalability of platform's frontend architecture through error/loading state management, strategic API caching, RSCs and memoization, and enhanced UX with fluid animations
- Delivered comprehensive analytics dashboards with interactive charts for multi-level bot performance tracking and visualization
- Engineered a scalable LinkedIn Automation microservice using Python FastAPI, MongoDB, and automation libraries, enabled sales leads automation

### Finlight

Frontend Developer Intern Sept 2022 - Feb 2023, Remote, India

- Developed a dynamic, user-friendly & responsive Finlight community webpage, which garnered 2000+ members on launch day
- Designed and implemented the coupon system in the admin panel, connecting it with frontend using REST APIs

## PROJECTS

### Digiwhistle

Influencer Management Platform

[Link](#) [GitHub](#)

- Built a fully responsive platform for managing influencer profiles, brand campaigns, and employee operations.
- Secure Authentication & Role Management using Next.js middleware, Higher Order Components, and Redux Toolkit.
- API-Driven Influencer Stats from social media platforms.
- Brand Campaign Management with multi-influencer collaboration and engagement tracking.
- Automated Financial Operations via Zoho Books and Razorpay APIs.

**Tech Stack:** NextJs, Typescript, Tailwind CSS, Redux Toolkit, NodeJs, PostgreSQL, Docker, Digital Ocean
